HOW TO PLAY

Players can purchase a POKER LOTTO ticket by asking the retailer for a POKER LOTTO InstaPik, where one play of 5 cards will print on the ticket.

Players can choose up to 3 selections per ticket for a maximum total ticket value of \$6.

Each selection will include 1 Instant Win game play and 1 Nightly Draw play.

ONE TICKET = 2 WAYS TO PLAY

INSTANT WIN: Players win the instant portion by viewing an animation of a 5 card poker game on the CDU and matching their hand with one of the winning hands displayed on the on the right side of the screen. If the instant play is a win, the terminal will play a winning sound and will highlight the winning cards and prize level on the CDU.

NIGHTLY DRAW: Players can also win on the nightly draw portion by matching 2, 3, 4 or 5 of the cards (you do not need a Poker hand to win). The draw's winning cards will be selected by an electronic draw machine.

Note: If the ticket is a winner on the instant portion, the player can choose to validate the ticket right away or wait until after the nightly draw. If the ticket is validated immediately, have the player sign the ticket and return the ticket for validation. The ticket must be signed and returned to the player.

VALIDATION

Instant Win: If a player wins Instantly and would like to validate the ticket right away, retailers must give the player the ticket to sign. Once the ticket is signed, the retailer can validate in order to pay out the prize (if the prize is under your maximum payout limit). Once the prize has been paid, the ticket is returned to the player for the nightly draw.

Retailers **must validate** the ticket before paying out the prize.
