ADDITIONAL INFORMATION

DOUBLE JACKPOT BULLSEYE SYMBOLS

The Double Jackpot Bullseye symbol is wild and substitutes for all non-wild symbols to make winning combinations. One Double Jackpot Bullseye symbol pays 2x the winning combination, except for jackpots. Two Double Jackpot Bullseye symbols pay 4x the winning combination, except for jackpots.

RESPIN

A Double Jackpot Bullseye symbol landing in the center position on reel 2 triggers the Respin. When the Respin triggers, reel 2 locks and the remaining reels respin. The Respin will continue to respin until a non-winning combination results. Reels are weighted differently in the Respin than in the base game. When betting lines 1-3, the maximum number of respins is 5. When betting lines 4 and 5, the maximum number of respins is 9.

Interrupted Game

In the event of disconnection, an interrupted bonus feature may be resumed immediately by starting the game again. The results of a completed reel spin (where display of the visual result was interrupted) will not be re-displayed within the game but may be reviewed in My Transaction History.

Any amount wagered on an unfinished spin will remain paused until you either complete the game, the game is voided, or it's auto completed within 24 to 48 hours. When an unfinished spin is voided, your bet will be refunded to your account.

Game History

The result of a completed game may be viewed in My Transaction History immediately after closing the game window. Results of unfinished games are not displayed in My Transaction History.

Expected Payback

The theoretical average return to player (RTP) is 95.15 – 95.95%. This RTP represents the long-term expected payback of the game which has been calculated by an independent testing lab. Bet settings determine the RTP percentage range; adjusting the bet settings to the maximum number of lines, bet levels, or bet multipliers provides the maximum RTP.
