

Game Objective

Dream Wheeler allows you to play the Money Wheel game of chance that is played using a large vertical wheel, spun by the game host. The Money Wheel game is extremely popular and is widely presented in TV game shows.

The wheel is divided into 54 equal segments separated by pins. 52 segments are marked with a number (1, 2, 5, 10, 20 or 40) with a unique color for each number. If the wheel stops at your chosen number after the spin, you win. The other two segments — 2x multiplier and 7x multiplier — act as bonus spins and multiply your next win!

Game Rules

Simply place a bet on a number you believe the wheel will stop at: 1, 2, 5, 10, 20 or 40.

The game host then spins the wheel. When it comes to a stop, the winning segment is indicated by the flapper at the top of the wheel. If the wheel stops with the flapper between two segments, the winning segment is the segment that the flapper passed, considering the wheel direction.

All bets are paid on a to one basis with the odds matching the number in the winning segment: e.g. winning number 5 pays 5 to 1, winning number 10 pays 10 to 1, and so on.

If the wheel stops on a multiplier segment (2x or 7x), then all bets remain in place and no new bets will be allowed. The wheel is spun again and the outcome of the spin (1, 2, 5, 10, 20 or 40) will determine the winning odds as usual but the odds will be multiplied twice or seven times over, depending on which multiplier the wheel stopped on in the previous spin.

If the wheel stops on a multiplier two or more times in a row, then all bets remain in place, and the multipliers stack: i.e. the multiplied payout from the last spin is multiplied again! The game host continues to spin the wheel until the spin stops on 1, 2, 5, 10, 20 or 40. For example, the wheel stops on 2x, then

on the next spin it stops on 7x, and on the next spin — on number 5. The outcome for the player who originally placed a bet on number 5, is: $(5 \text{ to } 1) \times 2 \times 7 = (10 \text{ to } 1) \times 7 = 70 \text{ to } 1$.

Consecutive multipliers are unlimited subject to a default maximum win displayed in the limits panel.

PLACE YOUR BETS

The CHIP DISPLAY allows you to select the value of each chip you wish to bet. Only chips of denominations that can be covered by your current balance will be enabled.

Once you have selected a chip, place your bet by simply clicking/tapping the appropriate bet spot in front of the wheel. Each time you click/tap the bet spot, the amount of your bet increases by the value of the selected chip or up to the maximum limit for the type of bet you have selected. Once you have bet the maximum limit, no additional funds will be accepted for that bet, and a message will appear above your bet to notify you that you have bet the maximum.

NOTE: Please do not minimize your browser or open any other tab in your browser while betting time remains, and you have placed bets on the table. Such actions may be interpreted as leaving the game, and your bets will therefore be declined for that particular game round.

You can also click/tap the BET ON ALL button which allows you to place a bet on all bet spots. The value of your selected chip will be placed on all bet spots simultaneously.

The REPEAT button allows you to repeat all bets from the previous game round. This button is only available before the first chip is placed.

The DOUBLE (x2) button becomes available after you have placed any bet. Each click/tap doubles all your bets up to the maximum limit. Note that you must have a sufficient account balance to double ALL your placed bets.

The UNDO button removes the last bet you placed.

You can click/tap the UNDO button repeatedly to remove bets, one by one, in the reverse order in which they were placed. You can clear all your bets by holding the UNDO button.

The TOTAL BET indicator displays the total amount of all bets placed in the current round.
