

Lucky Stars Keno

Introduction

LUCKY STARS KENO is a single player Keno with 80 numbers to choose from and 20 numbers randomly drawn at every round. You may select between 2 to 10 numbers. From the 20 numbers drawn, there are 3 numbers designated as the “Lucky Stars” numbers.

How to Bet

Choose between 2 to 10 numbers in the 80 numbers grid. Press on a desired number on the grid to select it. The number on the grid will be highlighted to indicate it has been selected. To unselect a number, press on a selected number. You may also press and drag to select multiple numbers.

You may use the stake selection menu to change your stake.

Once 2 or more numbers have been selected, press on the Play button to start the game. The game will randomly draw 20 numbers out of the 80 numbers.

When the drawn number lands on a number on the grid that has not been selected, the number on the grid will change to a distinct color. If the drawn number lands on a selected number, the number will change to a different color than previously.

Lucky Stars Numbers

There are 3 «Lucky Stars» numbers that will be drawn during each game. If any of the Lucky Stars numbers match the selected numbers, all winnings will be multiplied by the Lucky Stars multiplier. If more than one Lucky Star matches the selected numbers, the relevant multipliers will stack.

1. 1st is a Blue Lucky Star and it is always the first ball drawn and offers a 2X multiplier.
2. 2nd is a White Lucky Star and it is always the 10th ball drawn and offers a 2X multiplier.
3. 3rd is a Red Lucky Star and it is always the 20th ball drawn and offers a 4X multiplier.

How to Win

Winnings are paid according to the payable and depends on how many numbers you have selected and how many numbers matched. Winning payout is indicated in the payable and will adjust accordingly based on the numbers selection and the stake amount.

Paytable

Pick 2 Numbers		
Match	Payout X Stake	Probability
2 on 2	X10	1 in 17
Pick 3 Numbers		
Match	Payout X Stake	Probability
2 on 3	X1	1 in 8
3 on 3	X28	1 in 73
Pick 4 Numbers		
Match	Payout X Stake	Probability
2 on 4	X1	1 in 5
3 on 4	X4	1 in 24
4 on 4	X42	1 in 327
Pick 5 Numbers		
Match	Payout X Stake	Probability

3 on 5	X2	1 in 12
4 on 5	X18	1 in 83
5 on 5	X85	1 in 1 551
Pick 6 Numbers		
Match	Payout	Probability

	X Stake	
3 on 6	X1	1 in 8
4 on 6	X7	1 in 36
5 on 6	X24	1 in 324
6 on 6	X150	1 in 7 753
Pick 7 Numbers		
Match	Payout X Stake	Probability
3 on 7	X1	1 in 6
4 on 7	X2	1 in 20
5 on 7	X10	1 in 116
6 on 7	X52	1 in 1 366
7 on 7	X400	1 in 40 980
Pick 8 Numbers		

Match	Payout X Stake	Probability
4 on 8	X2	1 in 13
5 on 8	X6	1 in 55
6 on 8	X24	1 in 423

	<p>Quick Pick Randomly select numbers from the grid.</p>

	<p>Game settings Access additional game settings, such as audio settings.</p>
	<p>Info Display game's rules.</p>

Terms and Return to Player

In the event of a game in real play being interrupted, (i.e. started but not completed due to connectivity issues or accidentally closing the browser, etc.), depending on the previous state of the game, it will either resume from the point of the last draw or display the outcome of the game already in play. Any winnings will be correctly credited to the player account and will be exact according to the result prior to the game being interrupted.

In the event of a non-responsive game or problem during a bonus round, the game will repeat the incomplete game and display the result to the player when the game is next launched.

In the event of equipment failure or planned/unplanned terminations, progressive jackpot parameters, (including jackpot values and incremental percentages), are fully restored with identical parameters, after the restart.

The odds of getting a particular outcome are always the same at the start of every game. The odds do not vary based on prior outcomes, bet size, balance size, numbers picked, time of day, day of the week, etc. For example, if the top award is won on a given play of the game, the chances of winning the top award on the next play are exactly the same. Likewise, prior losses do not change future odds.

Any combination of wins in a single game is limited and will not exceed \$250,000.00. It may not be possible to reach this limit in a single game from every bet configuration.

The theoretical average return to player (RTP) is between 92.41% and 94.42% depending on how many numbers are picked. This RTP represents the long-term expected payback of the game. Malfunction voids all pays and plays.
