### **Terms and Return to Player:**

In the event of a game in real play being interrupted, (i.e. started but not completed due to connectivity issues or accidentally closing the browser, etc.), depending on the previous state of the game, it will either resume from the point of the last draw, or display the outcome of the game already in play.

Any winnings will be correctly credited to your account and will be exact, according to the result prior to the game being interrupted.

In the event of a non-responsive game or problem during a bonus round, the game will repeat the incomplete game and display the result to you when you next launch the game.

The outcome of any bonus round is predetermined by the server before you enter the bonus round.

The odds of getting a particular outcome are always the same at the start of every game.

The odds do not vary based on prior outcomes, bet size, balance size, time of day, day of the week, etc.

The theoretical average return to player (RTP) is 94.16%. This RTP represents the long-term expected payback of the game.

Malfunction voids all pays and plays.
